

Sample Title for Technical Report

Ivo Wengraf
PhD, FRGS, FCIHT

Tim Chatterton
PhD

A Technical Report for
the RAC Foundation

5 January 2024

Executive Summary

A short executive summary – no more than 1 – 2 paras/half-a-page tops – stating what analysis the report covers and what that analysis reveals.

1 Introduction

In a famous paper, Box and Cox ([1964](#)) introduced a family of transformations ...

Figure 1: *Simulated data from a $N(0,1)$ distribution.*

Figure [1](#) shows a kernel density estimate of simulated data from a $N(0,1)$ distribution. The sample variance is given by

$$s^2 = \frac{1}{n-1} \sum_{i=1}^n (x_i - \bar{x})^2 = 0.98. \quad (1)$$

Note that Equation [1](#) is an unbiased estimate of the variance, but it is not the maximum likelihood estimate (Rice [2007](#), p.269).
